AVG DISTANCE FROM RAIL PER SECTION

HOW TO READ THIS PAGE

Speed tops out where the horse was quickest. • **Stride Length** = ground gained per bound. • **Stride Rate** = how quickly the legs turn over. • **Speed** = Stride Length x Stride Rate. • **Distance from Rail** = metres off the fence each section; a lower, tighter line saves ground. • **Field average** — above the dashed line = faster than the field, below = slower.
