AVG DISTANCE FROM RAIL PER SECTION

HOW TO READ THIS PAGE

Speed tops out where the horse was quickest. · **Stride Length** = ground gained per bound. · **Stride Rate** = how quickly the legs turn over. · Speed = Stride Length × Stride Rate. · **Distance from Rail** = metres off the fence each section; a lower, tighter line saves ground. · ----- **Field average** — above the dashed line = faster than the field, below = slower.
